

AMBIANE™ AP

The first in a range of high-performance speciality luminaires, the Ambiane™ AP downlight is suitable for ambient lighting applications, wall washing and accent lighting where light quality is of the utmost importance. Its high CRI output, simple control mode with CCT and green correction, and perfectly matching dimming curve with tungsten lamps are all key features which give lighting designers a unique solution without any compromises. Available in RGBW and tunable white CCT versions, along with a variety of beam angles, the cool-running Ambiane™ AP is UV or IR radiation free making it ideal for a wide array of applications including theatres, auditoriums, ballrooms, hotels, offices, restaurants, retail environments and more. With both DMX and DALI control options, combined with a super-efficient LED source and high quality reflectors for optimum light output, the Ambiane™ AP can produce truly dramatic results!

KEY FEATURES

LED Output

Available in wide range of color configurations (RGBW, PW, TW and TD), the high-efficiency LED modules of the Ambiane AP provide the highest possible luminous flux 2,713 lm. With two different beam spreads to choose from (67° and 80°), the equally homogenized light output is secured by precisely designed output optics, and the fixture provides a 60,000 hour LED lifetime guaranteeing a dependable performance.

Control

Thanks to our unique L3™ (low light linearity) 18-bit dimming system, ultra-smooth fade to black and color mixing are now possible. The fixture's remote setting and device management is realized through DALI and DMX512 control protocols with RDM support and intelligent power balancing (always 50W output in any mixed color).

Installation

The low 48V DC input voltage secures a safe light operation with the possibility of backup power connection to protect against any unexpected black-out.
