

Anolis designs and manufactures the highest quality LED architectural lighting. All products are designed in our state of the art R&D facility by industry experts. Our fixtures are extensively tested to ensure they perform perfectly in the environment they were designed for. Utilisation of the latest LED technology ensures low power consumption and long lumen maintenance intervals.

Anolis Green 350

The Architecture of Light

Leading global manufacturer of high end architectural LED lighting, Anolis boasts an extensive range of fixtures to provide solutions for almost any environment. Our fixtures are renowned for longevity, high efficiency and environmental friendliness.

European Manufacturing

We are proud to manufacture all fixtures at our global Headquarters and factory in the Czech Republic, where we have complete control over the production process. All fixtures are ETL/cETL, CE and RoHS certified so you can be sure they will comply with local compliance laws. Only the best components are used in the production of Anolis products, coupled with the latest manufacturing techniques and machines, to ensure optimum performance for many years to come – even in the toughest environmental conditions. All fixtures undergo intensive product testing to ensure perfect performance.

Trusted Supplier

At Anolis we develop excellent relationships with our customers and distributors and welcome feedback on our fixtures in order to ensure continuous improvement. Our projects include large citywide architectural ventures across the globe: spectacular installations from Marina Bay Sands in Singapore and Waddesdon Manor in the UK, to the Mall of Africa.

Advanced R&D

The attention to detail that underlies our products starts at the Anolis R&D centre where all fixtures are designed in-house. Research and development is a core feature of the business so we invest heavily to develop the innovative solutions to our customers' challenges. The highly trained research engineers are dedicated to designing the most efficient and durable fixtures possible to match a huge range of applications including architectural, retail, commercial, industrial, domestic and entertainment.

Global Distribution

With 9 offices, and through our worldwide distribution network, we serve customers across the globe. Anolis also continues to develop its support network, working with organisations worldwide to ensure excellent customer service.

Eminere®1

Eminere®4

ArcSource™ Outdoor 48MC

Eminere® series

Precision in all its colours

The Eminere range by Anolis builds on the success of the original ArcLine Outdoor Series with precision optics and is available in a variety of sizes. It's perfect for a wide range of exterior and interior applications such as Flood Lighting, Wall Grazing, Wall Washing and Accent Lighting. Built to exact standards, these linear fixtures are durable enough to withstand extreme environments whilst producing beautiful colours from the RGBW, RGBA or PureWhite LED chips.

Architectural lighting has never been easier with linear LED fixtures designed to be the new industry standard. Eminere's flexibility offers designers a powerful tool to meet the most demanding scenarios of placement, environment, and light distribution. The ability to select specific LED chips across a wide range of colour temperatures combined with high-quality holographic filters delivers precise colour mixing and exceptional beam definition.

E-Box™

Waltham Forest Town Hall

A vibrant and elegant Anolis Eminere LED lighting design by architectural lighting practice Pritchard Themis is gracing the front façades of Waltham Forest Town Hall in East London, UK. The impressive Grade II listed building is the HQ of Waltham Forest London Borough Council, and the exterior lighting scheme was part of a substantial two-year refurbishment and upgrade project involving the whole building and its immediate environs. Hawkins\Brown architects was appointed to transform the stripped classical style Town Hall opened in 1942 into an integrated modern workspace combined with a lively civic campus. As part of that masterplan, Hawkins\Brown tasked the Pritchard Themis team with crafting the exterior lighting. Using the quality output and superior colour mixing of Anolis, a stylish signature white illumination was created for the front of the building, complete with an array of dazzling colour changing special looks to celebrate “flag days”, national and ethnic festivals plus other cultural and social events.

Eminere was designed by Anolis for a wide range of exterior and interior applications with a variety of lens options that can be used for flood lighting, wall grazing, wall washing and accent lighting. Equipped with Anolis' unique 18-bit colour mixing resolution ensures extra fine colour tuning as well as smooth dimming at low level of intensity. Designed in our state of the art R&D facility by industry experts. Eminere is IP67 rated and can withstand extreme conditions. Eminere is available in 1, 2, 3, and 4 foot sizes (300/600/900/1200 mm) with RGBW, RGBA or PureWhite multi chips as standard and is easy to control, 1 pixel per foot. Eminere fixtures can be used for both permanent and temporary installations, including various architectural and archtainment applications.

Scale

- Quick and Easy Installation** Plug & Play system means easy installation, fast adjustment and intuitive programming with self-addressing.
- Durability** Eminere is rated IP67, suitable for wet locations and has a protection rating of IK06. Marine grade finish option available for harsh environmental conditions (on request).
- Application Flexibility** Eminere's optics can be used for various applications including wall grazing, flood lighting, wall washing, wide flood lighting, spot lighting and accent lighting.
- Naturally Looking Result** Full spectrum coverage by using RGBW colour mixing with precise wavelengths of each colour for modern architecture or specifically designed combination of RGBA to highlight every single detail of historical buildings or monuments.

Eminere[®] Side

Eminere Side is specifically designed for applications where a low form factor is required whilst keeping installation of the luminaire neat and clean. With only 76 mm in height, it keeps all of the Eminere series strengths. Wide range of optics options, durability, connectivity, application flexibility make this luminaire ideal solution for flood lighting, wall grazing, wall washing and accent lighting.

Quick and Easy Installation

Easy and quick installation using click-on connectors overmoulded on combo cable (Power + Data).

Durability

High durability of IK06 in combination of ingress factor IP67.

Application Flexibility

Complete solution for illuminating buildings, monuments, walls, statues, bridges, coves, arches and much more. With PSU on its side, Eminere Side is only 76 mm in height.

Optics & Colours

Wide range of optics allows to place product anywhere needed with no limitation. Full spectral LEDs selection with custom option on request. Output up to 1147 lm (RGBW) or 1652 lm (PW) per one foot of Eminere.

Eminere[®] Inground

Eminere Inground is a robust luminaire designed to be installed into the ground. A stainless steel installation sleeve provides rust protection as well as "armour" for the Eminere fixture itself. Overall, Eminere Inground comes with an IP67 protection factor, standard or Anti-skid glass, and as always, perfect colour mixing. With $\pm 15^\circ$ tilt adjustment, precision optics with wide range of beam angles and colour variants, inground version of the Eminere luminaire is great choice for an exterior applications such as flood lighting, wall grazing, wall washing and accent lighting.

- Application** Anti-skid glass option for pedestrian areas application. Easy to install into soft and hard ground.
- Light Source** Full spectral LEDs selection with custom option on request. Output up to 2019 lm for Eminere Inground 2 RGBW. Long LED lifetime over 90 000 hrs. Manually adjustable tilt $\pm 15^\circ$ for fine adjustment of light beam.
- Durability** High durability with ingress factor of IP67 and walkover housing made from stainless steel with welded support for highest durability requirements.

Eminere[®] Remote MC

The member of the Eminere product range, Eminere Remote MC extends our series of linear architectural fixtures into further application possibilities using only low voltage for higher safety restrictions. Available in four sizes, ranging from 1 to 4 feet, Eminere Remote MC follows the identical optical and performance features of our other established and proven Eminere fixtures. Design-wise, Eminere Remote MC brings all of today's technology into an elegant and slim body, but is still very robust with an IP67 rating to withstand the harshest environments.

Scale

Optic & Control Output up to 938 lm (RGBW) per one foot of Eminere. With a wide range of optics for limitless fixture applications, Eminere Remote MC can also be operated in pixel (4 MC LEDs) or fixture modes, and its low-input voltages allow the luminaire to be used in applications with higher safety restrictions.

Compact Design The Eminere Remote MC is one of the thinnest lighting solution in our Eminere series and has been designed as a compact and slim LED luminaire suitable for any low-profile application.

Durability Thanks to its tempered glass and high-pressure, extruded aluminium housing, Eminere Remote MC is IK06 and IP67 certified. For more extreme and marine applications, a harsh environment finish option is also available.

UVinere™

An excellent solution for theme parks and entertainment venues where an attention grabbing UV effect is required, UVinere produces a true black light effect. Available in 2-foot or 4-foot models, UVinere evenly distributes UV output with a wavelength of 365 nm for a wide range of installations and designs. Utilising a powered E-Box, control for the UVinere is made possible over DMX (wired or wireless) or Ethernet protocols. Consistent with the design quality of the entire Anolis product portfolio, the UVinere range is robust and extremely durable with IP67 and IK06 ratings.

Scale

Optic & Control With a wavelength of 365 nm, UVinere provides UV black light using 10 000 hrs lifetime LEDs which can be powered by E-Box, and utilises DMX (wired or wireless) or ethernet protocols for control.

Physical UVinere is available in two physical models; 2-foot and 4-foot LED luminaires. This fixture is easily installed with the simplicity of a “plug and play” connection.

Durability Robust and durable, UVinere fulfills both IP67 and IK06 certification, backed by a 2 year warranty.

Agame™

The Agame luminaire is a multifunctional lighting solution with an IP67 rating, specifically crafted to accentuate the perimeters of windows and arches. This fixture, available in 8 W, produces a strikingly uniform monochromatic or RGBW / RGBA line of light, enhancing the aesthetic appeal of architectural façades. Additionally, the Agame luminaire has a 180° beam angle, ensuring wide and even light distribution across the intended area.

Scale

Lumen Output & Light Source

Available in range of RGBW and RGBA colour configurations, the high-efficiency LED modules of the Agame provides the highest possible luminous flux 117 lm. With the equally homogenised light output is secured by precisely designed output optics, and the fixture provides a 90 000 hour LED lifetime guaranteeing a dependable performance.

Control

Thanks to our unique L3 (low light linearity) 18-bit dimming system, exceptionally smooth fade to black and colour mixing are now possible. The fixture's remote setting and device management is realised through E-Box Remote.

Installation

The durable cast aluminium body provides a compact, stylish and easy-to-mount solution. The fixtures physical dimensions are Ø107 × 58 mm (Ø4.25 × 2.3 in.) and it weighs 0.45 kg (0.99 lbs).

Calumma™ XS MC

Using a single high-power, multi-chip LED inside a compact, elegant, and durable housing, the smallest Calumma is a great choice for many different lighting applications. Complementing both outdoor environments and interior designs, its wide range of beam angles, LED chip colour variant options and accessories make the Calumma XS MC an ideal, extra small lighting solution for any architectural design.

Scale

Lumen Output & Light Source

Luminaire with one high-power, multi-chip LED provides light output up to 331 lumens with an efficacy of 33 lm/W. Offering a choice of multiple LED colour variants, precise beam control with no light spill, and perfectly homogenised light output, it's an excellent solution for applications requiring high performance in a compact luminaire.

Design & Durability

Lightweight, compact, durable and stylish housing made of high-pressure die cast aluminium. IP67 and IK10 certification; suitable for marine applications (Harsh Environment Finish required) and traffic applications. Supported with a 5 year warranty.

Flexibility

An exceptionally compact luminaire available with a wide range of accessories, custom colour finishes, LED choices, and beam angle options, Calumma XS offers the lighting designer a flexible solution for the most demanding applications.

Calumma™ S MC

Featuring an optical design using three high efficacy multi-chip LEDs and available with optional LED colour variants and various beam angles, the small-sized Calumma S MC luminaire creates powerful and beautiful light output for a spot, accent or flood lighting solution. Its durable housing is built to withstand any exterior conditions, and its special finish for harsh and marine environments provides an exceptional outdoor LED luminaire in an elegant design. Complemented by a wide range of accessories, control protocols and connection options, this luminaire is an effective and versatile unit to get the most out of architectural lighting applications.

Lumen Output & Light Source

Luminaire with three high-power, multi-chip LEDs provides up to 993 lumen output. Multiple LED colour variants. No light spills. Perfectly homogenised light output with efficacy up to 33 lm/W.

Design & Durability

Compact, durable and stylish housing made of high-pressure die cast aluminium. IP67 and IK10 certification; suitable for marine applications (Harsh Environment Finish required) and traffic applications. Supported with a 5 year warranty.

Flexibility

Exceptional outdoor or indoor LED luminaire with a wide range of accessories, custom colour finishes, multiple light output variants and beam angles.

Connectivity

Calumma S MC can be connected via an E-Box and hybrid Plug & Play connections for almost effortless installation. DMX512 + RDM and wide range of Ethernet protocols are available for E-Box control. DMX/RDM or DALI 2 interface protocols facilitate standard connection options.

Calumma™ S SC

Featuring an optical design using nineteen high efficacy single-chip LEDs and available with optional LED colour variants and various beam angles, the small-sized Calumma S SC luminaire creates powerful and beautiful light output for a spot, accent or flood lighting solution. Its durable housing is built to withstand any exterior conditions, and its special finish for harsh and marine environments provides an exceptional outdoor LED luminaire in an elegant design. Complemented by wide range of accessories, control protocols and connection options, this luminaire is an effective and versatile unit to get the most out of architectural lighting applications.

Scale

Lumen Output & Light Source

Luminaire with nineteen high-power, single-chip LEDs provides up to 1958 lumen output (@10°, RGBW). Multiple LED colour variants. No light spills. Well homogenised light output with great efficacy up to 65 lm/W.

Design & Durability

Compact, durable and stylish housing made of high-pressure die cast aluminium. IP67 and IK10 certification; suitable for marine applications (Harsh Environment Finish required) and traffic applications. Supported with a 5 year warranty.

Flexibility

Exceptional outdoor or indoor LED luminaire with a wide range of accessories, custom colour finishes, multiple light output variants and beam angles.

Connectivity

Calumma S SC can be connected via an E-Box and hybrid Plug & Play connections for almost effortless installation. DMX512 + RDM and wide range of Ethernet protocols are available for E-Box control. DMX/RDM or DALI 2 interface protocols facilitate standard connection options.

Calumma™ MSC

Featuring an optical design using 37 high efficacy single-chip LEDs and available with optional LED colour variants and various beam angles, the medium-sized Calumma MSC luminaire creates powerful and beautiful light output for a spot, accent or flood lighting solution. Its durable housing is built to withstand any exterior conditions, and its special finish for harsh and marine environments provides an exceptional outdoor LED luminaire in an elegant design. Additionally, Calumma MSC can be connected in long In/Out daisy chains via an E-Box and hybrid Plug & Play connections for almost effortless installation. Complemented by wide range of accessories and control protocols, this luminaire is an effective and versatile unit to get the most out of architectural lighting applications.

Scale

Lumen Output & Light Source

Luminaire with 37 high-power, single-chip LEDs provides up to 3478 lumen output. Multiple LED colour variants. No light spills. Well homogenised light output with great efficacy up to 57 lm/W.

Design & Durability

Compact, durable and stylish housing made of high-pressure die cast aluminium. IP67 and IK10 certification; suitable for marine applications (Harsh Environment Finish required) and traffic applications. Supported with a 5 year warranty.

Flexibility

Exceptional outdoor or indoor LED luminaire with a wide range of accessories, custom colour finishes, multiple light output variants and beam angles.

Connectivity

Utilising the innovative E-Box series of power and data interfaces, Calumma MSC can communicate via numerous wired, wireless, and Ethernet-based control protocols. Various wiring topologies are supported using hybrid power/data cables with Plug & Play connectors or standard connection options.

Lyrae™ series

Hello I am
under the
ground

Lyrae Inground luminaires are part of a comprehensive collection of lighting solutions that have implemented motorized tilt technology to reduce light spill and preserve the night sky. Engineered for a wide range of applications, their stylish design and exceptional performance make them an excellent choice for enhancing the visual appeal of any architectural project. By using motorized tilt, the Lyrae is a state-of-the-art lighting fixture which can easily adjust its tilt angle to minimize light pollution and direct the light more effectively. An ideal choice for outdoor lighting applications, the Lyrae luminaire contributes to the preservation of the natural night environment, especially in areas where minimizing light pollution is a priority.

Lyrae™ XS Fix MC

Difficult inground installations are made easier with the Lyrae XS Fix MC. High light output comes from powerful LEDs and it can be used with a variety of optics, from narrow to wide, in addition to a bi-symmetrical option. Additionally, Lyrae XS Fix MC can be equipped with anti-skid glass featuring the highest standards of certification for anti-slip usage having no impact on the fixture's outstanding colour mixing.

Scale

Lumen output & Light source

Luminaire with one high-power LED provides light output with a high efficacy. Offering a choice of RGBW and RGBA LED colour variants, precise beam control with no light spill, and perfectly homogenised light output, it's an excellent solution for applications requiring high performance in a compact luminaire.

Design & Durability

Lightweight, compact, durable and stylish housing made of high-pressure die cast aluminium. IP68 and IK10 certification. Supported with a 5 year warranty.

Flexibility

An exceptionally compact luminaire available with RGBW and RGBA LED choices, and beam angle options, Lyrae XS Fix MC offers the lighting designer a flexible solution for the most demanding applications.

Divine™ series

Bringing lights

The Anolis luminaires utilise the latest LEDs for single and multi-chip devices in all colour specification and a wide range of beam angles. The Divine series brings perfect lighting solutions for large scale building exteriors and façades due to the phenomenal light output. Find the way to illuminate diverse locations with various mounting options and accessories. Divines are designed to withstand the toughest weather conditions at the most demanding applications.

Kauffman Center, USA
—
Divine™ 72

The Kauffman Center for the Performing Arts was designed by Moshe Safdie and is home to the Kansas City Ballet, Lyric Opera of Kansas City and Kansas City Symphony as well as heralded as one of the World's 15 Most Beautiful Concert Halls. Wanting to update the exterior lighting design to better illuminate and accentuate the incredible architecture, the Kauffman Center worked with Lankford Fendler + Associates who created a new lighting design using Anolis products supplied by Premier Lighting and Controls.

Divine™ 160

The Divine 160 is a high-performance 440 W luminaire with phenomenal light output that can be used for a variety of architectural lighting scenarios including the application of dynamic colour changing effects to building exteriors and façades, or illuminating complete areas with subtle CCT controllable white light. The Divine is available in numerous configuration options including optics for flood or accent lighting. RGBW, RGBA or PureWhite in a variety of colour temperatures combined with different mounting options and accessories make Divine a truly flexible solution.

Physical	With a compact and lightweight construction fulfilling IP67 and IK10 certifications, the Divine 160 multi-chip optical system delivers superb light with enhanced 18-bit control.
Lumen Output & Light Source	Providing an output up to 11 836 lm, the fixture utilises 40 high-power multi-chip LEDs.
Projected Lumen Maintenance	The long 90 000 hrs LED lifetime make Divine 160 an ideal choice for long-term lighting applications.
Power Consumption	Typical power consumption of the luminaire is 440 W.

Divine™ 72

The latest fixture in the Divine range, the Divine 72 features cutting-edge Zero Passive technology to eliminate light over-spill with our most precise optics to date. Specifically developed to optimise the beam for long throw applications, the native 6° beam angle delivers an impressive 6573 lx at 10 metres. Backed by a 5 year warranty and an IP67 rating, this unit has been designed for the rigours of extreme weather, and with flexible mounting options and accessories it can be installed on the most demanding projects.

Physical Optimised for long throw applications, patented beam control technology eliminates light spill.

Lumen Output & Light Source 72 high power LEDs provide up to 10 228 lm flux when RGBW colour configuration and 6° optics are used.

Projected Lumen Maintenance The long 90 000 hrs LED lifetime makes Divine 72 an ideal choice for long-term lighting applications.

Power Consumption Power consumption is only 325 W when operating at full power.

Divine™ 60 UV

Excellent for theme parks, attractions, leisure facilities and entertainment venues that require a true UV “black light” effect, both indoors and outdoors, this 180 Watt full LED luminaire produces high UV output levels at a 365 nm wavelength. Built-in DMX and RDM control enables precise lighting levels and the wireless control option allows retrofitting into existing installations without additional infrastructure. All the components are rated UV-stable and housed inside an IP67 rated casing, tough enough for the most challenging applications.

Key Features	Almost undetectable luminescence at normal lighting frequencies. Powerful output for indoor & outdoor effects.
Light Source	Light output is provided by 60 UV LEDs with 16 000 hrs (L70@25 °C / 77 °F) projected lumen maintenance.
Power Consumption	Typical power consumption of the luminaire is 180 W ±10 %.
Physical	Divine 60 UV fulfills an IP67 rating and is suitable for wet locations.
Control	Any third-party DMX controller can be used to control Divine 60 UV.

Synodus™ series

Lasts

The Synodus series takes versatility to the next level with an IP68-rated submersible design, making it an ideal choice for terrestrial and aquatic environments.

Forever

The submersible capability allows Synodus luminaires to thrive underwater, opening up a myriad of applications such as pond lighting, fountain illumination, or marine vessel accentuation.

Not Afraid of Corrosion

The housing of the Synodus series is crafted from marine bronze, a robust material chosen for its exceptional resistance to corrosion in hostile environments. This durability ensures an exceptional visual experience even when exposed to challenging conditions, making Synodus luminaires a reliable solution for diverse environments where corrosion resistance is paramount.

Synodus™

Architectural lighting sometimes brings specific requirements for fixture positioning which might be hard to comply with for 99% of the products on the market. With an extremely durable body, crafted from bronze to withstand the most challenging environmental conditions, Anolis Lighting introduces Synodus M. Utilising a standard LED colour set-up that can be customised to meet individual installation specifications, Synodus M can easily operate constantly submersed up to 10 m and offers more than 10 different beam options for positioning freedom.

Lumen output & Light source	With only a 100 W power consumption, the Synodus M provides well-mixed luminous flux 2101 lm thanks to its six multichip LEDs.
Lifetime	Its 90 000 hrs (L90B10) LED lifetime makes it an ideal low working-cost solution for submersed applications.
Physical	The unique construction of this LED luminaire allows it to be temporarily up to 10 m (32.81 ft.) under water. Its IP68 and IK10 rated housing is made from marine bronze to resist the corrosive effects of unfriendly environments, and the lenses are protected by tempered glass.

ArcPar™ 150 Outdoor

Designed with an all-in-one, approach the ArcPar 150 Outdoor makes installation smoother by allowing last minute tweaks and modifications on-site. The versatility of this unique product shines through with the introduction of its optical system which has a zoom ratio of 15.5:1 while an approximate range of 3.8°–60° makes ArcPar 150 Outdoor ideal for flood or spot lighting. The ArcPar 150 Outdoor has an IP 65 rating and is suitable for wet locations. As always, Anolis' signature quality colour mixing is present, easily selectable through a virtual colour wheel, preset with over 60 colour options. ArcPar 150 Outdoor has ROBE's innovative lens coating technology with benefits including bright and clear lenses, no scratches or marks, higher light output and longer intervals between cleaning.

Scale

Key Features	IP65 rated outdoor colour changing high power LED fixture with remote 3.8°–60° zoom.
Lumen Output & Light Source	Lumen output of 1676 lm is provided by seven high-power multi-chip LEDs.
Projected Lumen Maintenance	The projected lumen maintenance is 90 000 hrs (L90B10).
Power Consumption	220 W energy consumption provides excellent efficiency at low operating costs.
Physical	The durable cast aluminium body with lenses covered by tempered glass is a stylish, durable and easy-to-mount solution. The fixture's physical dimensions are 228 x 234 x 412 mm (8.97 x 9.21 x 17.64 in) and it weighs 7.92 kg (17.46 lbs).

ArcDot™

Excellent for large scale matrix applications due to its advanced pixel mapping capabilities, the ArcDot uses a RGBW Multi-chip with high light output that features a built-in intelligent electronic control system. This guarantees flicker-free operation and overheating protection whilst remote addressing, calibration and status messaging is also included. Built to an IP67 rating ensures the unit is capable of withstanding tough weather conditions but is also perfect for a wide variety of interior installations.

Scale

Key Features Flicker-free operation with advanced pixel mapping, remote addressing and status messaging with colour, lash and colour temperature options available.

Lumen Output & Light Source Lumen output of 139 lm is provided by high-power multi-chip LED.

Power Consumption 5.5 W energy consumption provides excellent efficiency with low operating costs.

Physical The durable cast aluminium body with opaque polycarbonate dome provides a compact, stylish and easy-to-mount solution. The fixtures physical dimensions are 77 × 71 mm (3.03 × 2.80 in) and it weighs 0.2 kg (0.44 lbs).

ArcPix™ II

Perfect for complex pixel mapping and media effects on structural surfaces, the ArcPix from Anolis is suitable for both interior and exterior applications. The Plug & Play electronics allow for up to 800 units to be connected to a single ArcPower Unit Pixel. Lighting designers have great flexibility to create dramatic visual effects in a variety of colours. The IP67 rating ensures the fixtures are tough enough to withstand the harshest environmental conditions, giving optimum performance for many years.

Key Features	Small controllable media fixture covered with clear polycarbonate can be connected into strings of 100 pcs up to 100 m in length. Up to 400 of ArcPix II can be connected to ArcPixel Power (800 pcs when connected to ArcPower Pixel Unit).
Lumen Output & Light Source	Lumen output of 86 lm is provided by one multi-chip LED.
Projected Lumen Maintenance	The projected lumen maintenance is 90 000 hrs (L90B10).
Power Consumption	Low 0.8 W energy consumption provides excellent efficiency at low operating costs.
Physical	Moulded plastic body with clear polycarbonate cover provides a compact and durable lighting solution. The fixture's physical dimensions are 56 × 24 mm (2.21 × 0.95 in) and it weighs 0.1 kg (0.22 lbs).

ProMotion™

Total control of your visual creations

Take retail promotions to the next level with the ProMotion moving head effects and video projector. This Full-HD projector produces 1000 ANSI Lumens of creative output with its long-lasting LED source. Digital gobo patterns with graphic effects plus still and videos images. Uploading brand logos, custom artwork, photographs and videos is fast and easy from either a local or off-site multimedia source. With keystone, iris and motorised focus, you have total control of your visual creations. There is also a live streaming input for on-site promotions and integration with other media sales systems.

Ambiane® series

Let the show begin

TivoliVredenburg, Netherlands

Ambiane® RGBW LED

with right emotions

The Ambiane series is an architectural lighting range that provides the highest quality of illumination. From recessed to surface mount and pendant mounting location, the variability of the range is ideal for auditoriums, houses of worship, entertainment studios, museums, art galleries, conference rooms, and hotel foyers and ballrooms. Offering the highest optical performance, easy control, and mounting flexibility, the Ambiane series was built to cover long, medium, and short throw applications.

TivoliVredenburg, Netherlands
—
Ambiane® RGBW LED

The TivoliVredenburg in central Utrecht, The Netherlands, features seven different music performance spaces and recently had its house and public area lighting upgraded with Anolis Ambiane RGBW LED luminaires.

The image shows a modern interior space with a ceiling composed of large, light-colored panels arranged in a complex, overlapping geometric pattern. Several recessed square lights are embedded in the ceiling. Three black stage lights are suspended from the ceiling. The walls are illuminated with a vibrant purple light, and a row of rectangular panels with a grid-like pattern is visible along the bottom edge.

Aesthetically

pleasing

Anolis luminaires are developed with an emphasis on performance, flexibility, longevity, control, and last but not least, design ingenuity. Recessed versions of Ambiane seamlessly fit into false-ceiling installations, while pendant versions complement the spacious interior of larger spaces. Its carefully chosen materials, smooth connections edges, and multiple colour finish options, make Ambiane an ideal lighting solution for interior installations.

Ambiane[®] SP16 Recessed

The smallest luminaire of Ambiane range with only 108 mm in diameter offers efficient, powerful and high-quality solution for lower ceiling recessed applications. Highly efficient LED module with CRI 90+, no UV or IR emissions, CCT and green correction settings is perfect for museums, art galleries, theaters, concert halls and other most demanding installations. Sharing the same LED chip-set with other Ambiane fixtures it complements the range and gives lighting designers even more options for various interior lighting installations.

Lumen output & Light source

Available in wide range of colour configurations (RGBW, PW, TW, TD), the Ambiane SP16 Recessed utilises highly efficient LED modules with CRI 90+. The fixture offers two different beam spreads of 30° and 60°.

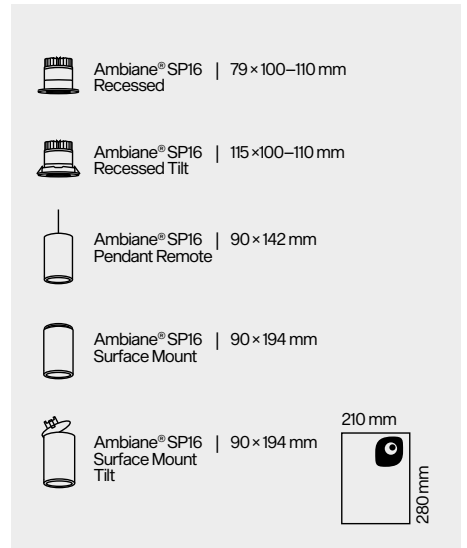

Control

Using DALI or USITT DMX512 control protocols, with RDM support, Ambiane SP16 Recessed can be remotely controlled and managed. Ambiane SP16 Recessed also offers intelligent power balancing.

Installation

With compact dimensions, Ambiane SP16 Recessed is suitable for lower ceiling applications and to complement our more powerful luminaires of Ambiane range. Ambiane SP16 Recessed is convection cooled for silent operation without fans.

Ambiane[®] MP111 Recessed

As the mid-size luminaire in the Ambiane series, the new Ambiane MP111 Recessed is designed for lower ceiling installations or to cover areas where the power of the Ambiane HP111 is not necessary. Using the same light source specification as all other Ambiane series members, the fixture is an ideal add-on to lighting designs using a host of Ambiane luminaires. Giving designers and installers a choice of 20, 40, 60 or 80-degree optical beam spreads, the Ambiane MP111 provides an endless array of positioning options across an entire installation. The incorporation of our L3 (Low Light Linearity) dimming system allows seamless fades to black even when mixed with traditional sources. With no UV or IR emissions which make it ideal for museums as well, the fixture is easily controlled via DMX or DALI and is RDM compatible.

Lumen output & Light source

Available in wide range of colour configurations (RGBW, PW, TW, TD), the Ambiane MP111 Recessed utilises highly efficient LED modules with CRI 90+ ensuring you can always see every colour without colouring distortion. Equally homogenised light output is secured by precisely designed output optics with the highest possible luminous flux 2206 lm and a 90 000 LED lifetime which guarantees low maintenance cost and long-lasting light output. The fixture offers four different beam spreads (20°, 40°, 60° and 80°) for precisely defined light output, required in a lighting installation.

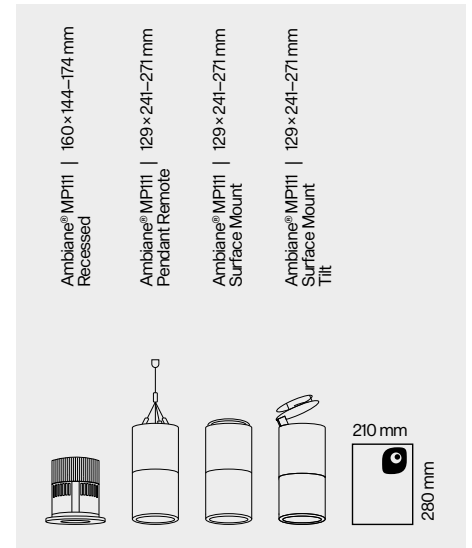

Control

Thanks to our unique L3 (low light linearity) 18-bit dimming system, exceptionally smooth fade to black and colour mixing are now possible. The fixture's remote setting and device management is realised through DALI and DMX512 control protocols with RDM support and intelligent power balancing.

Installation

Mounting via holders into false ceiling as an ideal replacement for an outdated AR111 fixture.

Ambiane[®] AP

Compact and powerful downlight from Ambiane range is suitable for ambient lighting applications, wall washing and accent lighting where light quality is of the utmost importance. Its high CRI output, simple control mode with CCT, green correction, and perfectly matching dimming curve with tungsten lamps give lighting designers a unique solution without any compromises. Available in RGBW and tunable white CCT versions, along with two beam angles options, the cool-running Ambiane AP is UV or IR radiation free making it ideal for a wide array of applications including theatres, auditoriums, ballrooms, hotels, offices, restaurants, retail environments and more. With both DMX and DALI control options, combined with a highly efficient LED source and high-quality reflectors for optimum light output, the Ambiane AP can produce truly dramatic results.

Lumen output & Light source

Available in wide range of colour configurations (RGBW, PW, TW and TD), the high-efficiency LED modules of the Ambiane AP provides the highest possible luminous flux 2713 lm. With two different beam spreads to choose from (67° and 80°), the equally homogenised light output is secured by precisely designed output optics, and the fixture provides a 90 000 hrs LED lifetime guaranteeing a dependable performance.

Control

Thanks to our unique L3 (Low Light Linearity) 18-bit dimming system, exceptionally smooth fade to black and colour mixing are now possible. The fixture's remote setting and device management is realised through DALI and DMX512 control protocols with RDM support and intelligent power balancing (always 50 W output in any mixed colour).

Installation

Fixture is mounted via spring clip holders into false ceiling low 48 V DC input voltage secures a safe light operation with the possibility of backup power connection to protect against any unexpected blackout.

Ambiane[®] XP56 Recessed

Specifically designed for large theatres, concert halls, auditoriums, houses of worship and hotel foyers that require general ambient light, with the added ability to create mood, the Ambiane XP56 Recessed is the ideal, stylish solution. This high-performance RGBW luminaire delivers in excess of 10 000 lm and is perfect for setting the mood via its super-smooth colour mixing abilities. Available in 20°, 30°, 45° or 60° beam spreads, Ambiane XP56 Recessed provides perfect coverage of any area. The incorporation of our L3 (Low Light Linearity) dimming system allows seamless fades to black even when mixed with traditional sources. With no UV or IR emissions making it ideal for museums as well, the fixture is easily controlled via DMX or DALI and is RDM compatible. Ambiane XP56 Recessed has been designed for easy installation and is perfect to retrofit into existing PAR 56 size cut-outs.

Lumen output & Light source

Available in wide range of colour configurations (RGBW, PW, TW, TD), the Ambiane XP56 Recessed utilises highly-efficient LED modules with CRI 90+ ensuring you can always see every colour as it should be. Through the highest possible luminous flux 10 107 lm, the fixture offers many different beam spreads (20°, 30°, 45° and 60°) for the precise light needed in your lighting installation.

Control

Thanks to our unique L3 (Low Light Linearity) 18-bit dimming system, ultra-smooth fade to black and colour mixing are now possible. The fixture's remote setting and device management is realised through DALI and DMX512 control protocols with RDM support.

Installation

Replacing an old Par 56 has never been easier as Ambiane XP56 Recessed provides an absolutely silent solution thanks to its fanless construction and robust heat sink. Mounted via false ceiling adaptor or standard yoke, it has Trim or Louver as an optional accessory. The low 48 V DC input voltage secure safe light operation and secondary power for back-up lighting.

Ambiane[®] XP56 Pendant Remote

A significant part of architectural lighting, without any doubts, is retrofitting of installations. In reaction to this fact, Anolis has enriched the Ambiane series and offers a new LED pendant version with remote power supply. Using three adjustable wires which allow installers to set an ideal horizontal position of the fixture according to the optical and design requirements, the Ambiane XP56 Pendant Remote power supply uses the existing electrical circuits. Specifically designed for large theatres, concert halls, auditoriums, houses of worship and hotel foyers that require both general ambient light and the ability to control the visual experience, the Ambiane XP56 Pendant is an ideal, stylish solution. Optically, this high-performance RGBW luminaire delivers in excess of 10 000 lm and is perfect for setting the mood via its extremely smooth colour mixing capabilities. Available in 20, 30, 45 or 60-degree beam spreads, Ambiane XP56 Pendant Remote provides perfect coverage of any area. The incorporation of our L3 (Low Light Linearity) dimming system allows seamless fades to black even when mixed with traditional sources. With no UV or IR emissions which make it optimal for museums as well, the fixture is easily controlled via DMX or DALI and is RDM compatible.

Lumen output & Light source

Available in a wide range of colour configurations (RGBW, PW, TW, TD), the Ambiane XP56 Pendant Remote utilises a high-efficiency LED engine reaching 42 lm/W efficiency. With CRI 90+, you can always see every colour without colouring distortion. The lifetime over 90 000 hrs, provided by its high-quality LED modules, guarantees low maintenance cost and a long-lasting light output. Offering many different beam spreads (20°, 30°, 45° and 60°), you can precisely define light output, required in a lighting installation.

Control

Thanks to our unique L3 (Low Light Linearity) 18-bit dimming system, exceptionally smooth fade to black and colour mixing are now possible. The fixture's remote setting and device management is realised through DALI and DMX512 control protocols with RDM support.

Installation

Fixture is mounted by one hanging wire and three adjustable wires for desired position and length. Power supply is hidden in false ceiling, which allows the fixture to be easily mounted onto slope ceiling. The low 48 V DC input voltage secures a safe light operation with the possibility of a backup power connection to protect against any unexpected blackout.

Ambiane[®] XP56 Pendant

Following the success of our Ambiane XP56 Recessed luminaire for ceiling installations, Anolis introduces our elegant LED pendant for your architectural lighting design. Ambiane XP56 Pendant accommodates three adjustable wires which allow installers to set an ideal horizontal position of the fixture according to the optical and design requirements. Specifically designed for large theatres, concert halls, auditoriums, houses of worship and hotel foyers that require both general ambient light and the ability to control the visual experience, the Ambiane XP56 Pendant is an ideal, stylish solution. Optically, this high-performance RGBW luminaire delivers in excess of 10 000 lm and is perfect for setting the mood via its extremely smooth colour mixing capabilities. Available in 20, 30, 45 or 60-degree beam spreads, Ambiane XP56 provides beautiful illumination in any area. The incorporation of our L3 (Low Light Linearity) dimming system allows seamless fades to black even when mixed with traditional sources. With no UV or IR emissions which make it optimal for museums as well, the fixture is easily controlled via DMX or DALI and is RDM compatible.

Lumen output & Light source

Available in a wide range of colour configurations (RGBW, PW, TW, TD), the highly efficient LED modules of the Ambiane XP56 Pendant are equally homogenised for a consistent light output. With precision optics and a luminous flux 10 107 lm, the fixture's lifetime 90 000 hrs LED modules guarantee low maintenance cost and long-lasting output. Fixture comes in many different beam spreads (20°, 30°, 45° and 60°), for precisely defined light output, required in a lighting installation.

Control

Thanks to our unique L3 (Low Light Linearity) 18-bit dimming system, exceptionally smooth fade to black and colour mixing are now possible. The fixture's remote setting and device management is realised through DALI and DMX512 control protocols with RDM support.

Installation

Mounted on ceiling and pending on three wires for easy length and position adjustments. Secondary power input for backup lighting option and absolutely silent solution thanks to its fanless construction and robust heat sink.

Ambiane[®] SP16 Surface Mount

The smallest luminaire of Ambiane range offers efficient, powerful and high-quality solution for lower ceiling recessed applications. Highly efficient LED module with CRI 90+, no UV or IR emissions, CCT and green correction settings is perfect for museums, art galleries, theaters, concert halls and other most demanding installations. Sharing the same LED chip-set with other Ambiane fixtures it complements the range and gives lighting designers even more options for various interior lighting installations.

Lumen output & Light source

Available in wide range of colour configurations (RGBW, PW, TW, TD), the Ambiane SP16 Surface Mount utilises highly efficient LED modules with CRI 90+. The fixture offers two different beam spreads of 30° and 60°.

Control

Using DALI or USITT DMX512 control protocols, with RDM support, Ambiane SP16 surface Mount can be remotely controlled and managed. Ambiane SP16 Surface Mount also offers intelligent power balancing.

Installation

With compact dimensions, Ambiane SP16 Surface Mount is suitable for lower ceiling applications and to complement our more powerful luminaires of Ambiane range. Ambiane SP16 Surface Mount is convection cooled for silent operation without fans.

Ambiane[®] MP111 Surface Mount

As the mid-size luminaire in the Ambiane series, the new Ambiane MP111 Surface Mount is designed for lower ceiling installations or to cover areas where the power of the Ambiane HP111 is not necessary. Using the same light source specification as all other Ambiane series members, the fixture is an ideal add-on to lighting designs using a host of Ambiane luminaires. Giving designers and installers a choice of 20, 40, 60 or 80-degree optical beam spreads, the Ambiane MP111 provides an endless array of positioning options across an entire installation. The incorporation of our L3 (Low Light Linearity) dimming system allows seamless fades to black even when mixed with traditional sources. With no UV or IR emissions which make it ideal for museums as well, the fixture is easily controlled via DMX or DALI and is RDM compatible.

Lumen output & Light source

Available in wide range of colour configurations (RGBW, PW, TW, TD), the Ambiane MP111 Surface Mount utilises highly efficient LED modules with CRI 90+ ensuring you can always see every colour without colouring distortion. Equally homogenised light output is secured by precisely designed output optics with the highest possible luminous flux 2235 lm and a 90 000 LED lifetime which guarantees low maintenance cost and long-lasting light output. The fixture offers four different beam spreads (20°, 40°, 60° and 80°) for precisely defined light output, required in a lighting installation.

Control

Thanks to our unique L3 (low light linearity) 18-bit dimming system, exceptionally smooth fade to black and colour mixing are now possible. The fixture's remote setting and device management is realised through DALI and DMX512 control protocols with RDM support and intelligent power balancing.

Ambiane[®] HP111 Surface Mount Tilt

Surface mount version of Ambiane is ideal for mid-throw application onto a levelled ceiling. Same light source specification hidden inside of the beautiful design makes this fixture an ideal add-on to lighting design of Ambiane series. Giving designers and installers a choice of 20, 40, 60 or 80-degree optical beam spreads, the Ambiane HP111 provides an endless array of positioning options across an entire installation. The incorporation of our L3 (Low Light Linearity) dimming system allows seamless fades to black even when mixed with traditional sources. With no UV or IR emissions which make it ideal for museums as well, the fixture is easily controlled via DMX or DALI and is RDM compatible. Tilt 0°–80°.

Lumen output & Light source

Available in wide range of colour configurations (RGBW, PW, TW, TD), the Ambiane HP111 Surface Mount utilises highly efficient LED modules with CRI 90+ ensuring you can always see every colour as it should be. Equally homogenised light output is secured by precisely designed output optics with the highest possible luminous flux 3239 lm and a 90 000 LED lifetime which guarantees low maintenance cost and long light output. The fixture offers many different beam spreads (20°, 40°, 60° and 80°) for the precise light needed in your lighting installation.

Control

Thanks to our unique L3 (low light linearity) 18-bit dimming system, exceptionally smooth fade to black and colour mixing are now possible. The fixture's remote setting and device management is realised through DALI and DMX512 control protocols with RDM support and intelligent power balancing (always 75 W output in any mixed colour).

Installation

An ideal replacement for an outdated AR111 fixture, the Ambiane HP111 Surface Mount offers the possibility of a backup power connection to protect against any unexpected blackout and operate as emergency lighting.

Source	Light Source Type	RGB LED device
	Lifetime	20 000 hrs
		Eco mode: extended life time of LED source
Projector Specifications	Light Output	1000 ANSI lumens (Comparable with 5000 ANSI lumen lamp projectors)
	Aspect Ratio	16:9
	Resolution	1920 × 1080
	Beam Angle	17°
	Throw Ratio	3.5:1
	Contrast Ratio	500:1
	Display Colours	16.7 million colours
	Optional Wide Lens	26°
	Throw Ratio Wide Lens	2.3:1
Main Features		Colour Mixing mode RGB/CMY
	White Light	Variable CCT 3200 K – 9500 K
	Colour effect wheel with wide range of in-built effects	Colour transitions and cross-fades, multiple colour images, rainbow effects
	Digital gobo wheel 1	With standard gobos, images and videos
	Digital gobo wheel 2	With user's gobos, images and videos
		Gobo rotation and indexing
		Live input via external High Definition Multimedia Interface
		Effect speed control
	Keystoning	Horizontal / Vertical
	ADM™ Automatic distance meter	Upon Request
		Grey box correction
	Motorized focus	
	Pre-programmed random strobe & pulse effects	
	Dimmer	0–100%
	Epass™	Ethernet pass through switch
Control & Programming	Setting & Addressing	ROBE Graphic Touch Screen (50 × 40 mm / 1.97" × 1.57")
	Protocol	USITT DMX-512, RDM, ArtNet, MA Net, MA Net2, sACN
		REAP™ – ROBE Ethernet Access Portal
	Wireless CRMX™ technology from Lumen Radio	Upon Request
	DMX Protocol Modes	2
	Control channels	25, 33
	RTC (Real-time clock)	Built-in device to keep track of actual time in order to start and stop playback at given time
	Stand-alone operation	
Content Management		Remote content management
	Internal Storage	High speed internal memory for user content – 32 GB

Anolis Green

We are dedicated to making a difference wherever and whenever we can.

Caring for the environment means doing things that will keep the Earth healthy. It's up to us to do what we can to care for the environment. There are plenty of ways to be green and make eco-friendly choices that help our planet!

Since 1994

ROBE s.r.o. and its brand Anolis a Robe business is the global company that pursues a proactive policy of sustainable trading and business practices where possible, and takes its responsibility to employees, the community, and the planet very seriously. The company has focused on this approach to its development and growth since it was founded in 1994. Since then, it has been committed to ensuring that both its production processes and products are genuinely greener and more environmentally friendly. The interest in bringing innovative and emerging technologies to the market can be traced back to the company's roots. The "Think of the Future Consider Nature" marketing campaign was one of many memorable early brand activations from the last decade, highlighting a philosophy at the heart of Anolis's operation.

Soil Protection

We are dedicated to making a difference wherever and whenever we can. Caring for the environment means doing things that will keep the Earth healthy.

It's up to us to do what we can to care for the environment. There are plenty of ways to be green and make eco-friendly choices that help our planet!

Recultivation

The problem of recultivation in conditions of a constantly increasing area of disturbed lands acquires great socio-economic and ecological significance. The issue of recultivation is always included in our projects for the construction and renovation of old premises and in the plans of land management.

Solar panels

Besides providing us with light and warmth, solar energy helps us save non-reusable energy sources. We started taking all the necessary steps to take advantage of solar energy at the beginning of 2022. A photovoltaic system with a peak power of 1.3 MWp will be installed on the roofs of Anolis and ROBE's factory buildings in Valasske Mezirici order to generate electricity from sunlight.

Using sunlight to create electric energy not only helps lower CO₂ emissions but also lowers energy costs.

1.08 GWh

1 year electricity production

552.17 t

CO₂ emission reduced

25 361

Equivalent to the planting of 25 361 new trees

Energy balance

Produced energy	1 266 630 kWh/year
Produced energy offtake	1 018 320 kWh/year
Electrical energy supplied to network	80%
Building energy consumption	248 310 kWh/year
CO ₂ savings	526.5 ton/year
Self-sufficiency	32%

Connecting electricity and heat

Generating electricity and heat at once? Yes. Thanks to the planned cogeneration units we'll be able to generate electricity and use the excess heat for Anolis production spaces and office heating.

Considering our footprint

It's up to each of us, how we'll decide to help the environment. Anolis chooses reusable sources of energy and we are doing our part in other environmentally-friendly activities and our production set-up. Take a look at what we do and how we help the planet by our eco-optimized processes.

Shortening delivery route

We are proud to manufacture all fixtures at our global Headquarters and factory in the Czech Republic, where we have complete control over the production process. All fixtures are ETL/cETL, CE and RoHS certified so you can be sure they will comply with local compliance laws. Only the best components are used in the production of Anolis products, coupled with the latest manufacturing techniques and machines, to ensure optimum performance for many years to come – even in the toughest environmental conditions. All fixtures undergo intensive product testing to ensure perfect performance.

Since shortening the delivery route in 2016 we have saved 3.2 t of CO₂ that represents 150 trees.

Production instructions

We reduce paper consumption as much as we can. We do not print any production instructions. All the production instructions are communicated via energy-saving LED screens in the production workshops.

By using energy saving LED screens instead of paper documents we're saving 1.3 t of CO₂ per year that represents 60 trees.

Final Packing of Products

Packaging of component and products, to stay working smartly and sustainably, and to measure our impact on the environment, we are constantly setting targets for selfimprovement through reviewing, updating, and implementing policies and working practices at our factory. In addition to recycled polystyrene and ecological film that has been used for many years in the company we try to find a fully ecological replacement

Sustainable Waste Management

We're constantly monitoring the materials and techniques used to ensure that waste is minimised and that all our manufacturing processes are as clean as possible and not consuming excesses of water and electricity. Recycling is actively promoted in all departments and we're still looking for the new ways to reuse waste and new ways of recycling.

79.2% + 20.8% = 100%

of waste is recycled

of waste is ecologically processed through methods such as incineration, composting, and landfilling.

of waste is handled

Anolis Products Are Designed To Last

Product longevity for resource conservation – Anolis products are designed to last and offer long-term reliability, engineered and built for continuity between generations of ‘industry standard’ luminaires, applying sustainability across Anolis entire portfolio. Making every product as versatile as possible ensures maximization of the invested resources and energy with each one working on as many different events as possible during its lifespan.

Green marketing

Green marketing – Anolis believes in using its business, resources, and influence to inspire much wider and ‘bigger picture’ solutions in the world of entertainment and architectural lighting, and by harnessing the power and potential of new technologies to assist in contributing to a healthy environment that will help safeguard a future for all. That’s why also our marketing walks on a green path.

We’re in the process of supplying our merchandise in eco-friendly packaging, as well as eliminating the printing of leaflets to lower paper consumption and save energy during the printing process.

We do not use plastic...
When possible we prefer online...

Product documentation is digital only since 2019

Instruction product manuals are digital only since 2022

We do not support any print media advertising since 2022. Online only.

Humans are a core driver for sustainability – It is our belief that ROBE’s and Anolis strength lies in its people. We are proud of our low staff turnover and high loyalty, and the welfare and well-being of those working in all departments is central to our day-to-day operations. Everyone can enjoy a positive, clean working environment where staff facilities include a contemporary canteen with nutritious food. We cook for our almost 900 employees every day, our meal is served on reusable plates with no plastic materials included and our employees do not need to travel having a lunch by the car which lowers CO₂ emissions.

Achieving Sustainable Excellence

We are proud to announce that Anolis has been awarded the prestigious Sustainable Company Certification 2023. This recognition reflects our commitment to environmental sustainability and responsible practices. One of the key initiatives that contributed to this achievement is our Ekolamp take-back compliance scheme, ensuring the proper disposal and recycling of lighting products. We remain dedicated to making a positive impact and setting an example for a greener future.

You can see the certificate here

Thinking and acting for the long term

Anolis believes in using its business, resources, and influence to inspire much wider and 'bigger picture' solutions not only in the world of entertainment and architectural lighting, and by harnessing the power and potential of new technologies to assist in contributing to a healthy environment that will help safeguard a future for all.
